-----------------	-----------------------------	----------

Anchorseal, with anti-freeze is available for purchase through our club. Our club purchases a 55-gallon drum and it is dispensed as members request it.

The price is \$15 for 2 gallons

Please pay our club secretary (Walt Ahlgrim) directly

To order the Anchorseal, Contact Dave Endres:

314-568-1244

endrestoh@att.net

You can pick-up your order with 2 business days notice

Dave's office is in Treecourt Industrial Court, 63122

You can pick-up your order at a club meeting with 3 business days notice

Please, save your containers and reuse them.

Show and Tell

Demonstration

Dan Burleson demonstrated how to turn objects from used bowling pins. Bowling alleys dispose of the pins once they will no longer move through the automatic pin reset machine.

The pins are made from laminated rock maple and are covered with about 1/8 inch thick layer of plastic. When the plastic breaks loose, it catches in the machines and the pins will not reset.

The first step is to turn and remove the plastic layer. Dan recommends wearing a full face shield and turning a low speed. The plastic can break off in large chunks.

All the pins have a hole and a void machined into their base. These are used to meet weight and balance requirements.

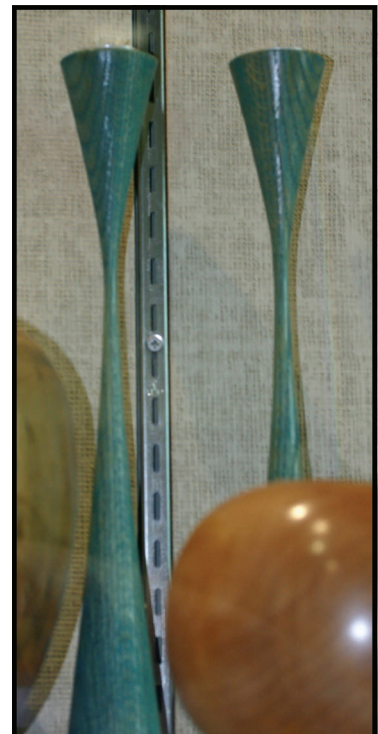

Dan can usually get 2-3 small projects out of each pin. For example, a pencil holder, a small goblet / scoop, and a spinning top. The yield depends upon the location of the voids and the physical damage to the pin.

Exhibit

Rick Mosley had an exhibit at the House Springs Branch of the Jefferson County Library. Rick is a former member of our club.
